EDUCATION

2024 – 2026 **MSc.**, London School of Hygiene & Tropical Medicine, United Kingdom

2011 – 2016 **B.Eng.**, Ha Noi University of Transport and Communications, Vietnam
GPA: 8.19/10 (3.43/4)

AWARDS

2016 **Award for student who has achieved very good graduation results.** Hanoi University of Transport and Communications.

2015 **Annual award for student who has achieved very good results of the year.** Hanoi University of Transport and Communications.

2015 **Third prize for student scientific research. Topic: Applying SHIOMI method to organize separate lanes for motorbikes on 5 pilot routes in Hanoi.** Hanoi University of Transport and Communications.

2014 **Third prize for student scientific research. Topic: Optimal design of reinforced concrete beams according to standard 22TCN 272-05.** Hanoi University of Transport and Communications.

EXPERIENCE

Jan 2023 – Present **Research Assistant and Project Manager**, Mathematical Modelling Group, Oxford University Clinical Research Unit, Vietnam

Project: Advance Warning and Response Exemplars
Supervisor: Assoc. Prof. Jennifer IloVan Nuil

- Facilitate and conduct in-depth interviews with policymakers related to climate sensitive diseases early warning systems in Vietnam
- Analyze collected qualitative data, contribute to writing project report and manuscript

Project: Dengue Advanced Readiness Tools (DART)
Supervisor: Assoc. Prof. Marc Choisy

- Clean, correct where needed and visualize data related to dengue collected from Ho Chi Minh Center for Disease Control
- Manage the project: Prepare collaboration documents, organize meeting and travel for DART members

Project: Building citizen science intelligence for pandemic preparedness and response – Pilot implementation in collaboration with Brazil and Kenya

Supervisor: Assoc. Prof. Marc Choisy

- Co-design and facilitate a series of workshops using Participatory Modelling method to produce a contextual Actors-Resources-Dynamics-Interactions model together with a group of approximately 40 participants comprising citizens, researchers, healthcare workers and policy makers
- Co-design a serious Role-playing game and an Agent-based model using Companion Modelling approach
- Conduct and publish a statistical analysis using ordinary logistic regression on data collected from 9 countries

Jan 2022 – Dec 2022

Research Assistant, Biostatistics Group, Oxford University Clinical Research Unit, Vietnam

Project: Using contact-tracing data from Viet Nam to estimate the distributions of latency and incubation time of SARS-CoV-2 infections

Supervisor: Assoc. Prof. Marc Choisy and Dr. Le Hoang Thanh Nhat

- Extract information from contact tracing case reports. Perform curation and cleaning of the contact tracing data
- Evaluate, discuss and modify the questionnaires that Vietnam National Institute of Hygiene and Epidemiology / Ho Chi Minh Center for Disease Control used for contact tracing during the COVID-19 pandemic. The modified questionnaires can be used for future infectious disease outbreaks to obtain timely and accurate information on the exposure window based on the contact network, with a minimal impact on individual privacy. Write a prototype app, using the KoboToolbox framework, for data entry and automated data checking
- Use R, R Shiny to visualize the transmission network in an interactive way

Jul 2021 – Dec 2021

Research Assistant, Mathematical Modelling Group, Oxford University Clinical Research Unit, Vietnam

Project: Modelling COVID-19 in Vietnam

Supervisor: Assoc. Prof. Marc Choisy

- Search in online newspapers, government websites and articles to find information on COVID-19 Cases in Vietnam between Jan 2020 and Mar 2021
- Using R to compare the information above with a COVID-19 research database and correct where needed
- Self-study of statistics and modelling

Apr 2020 – Jul 2021

Freelancer – Career Break, Ho Chi Minh City, Vietnam

- Translate between Vietnamese and English in the functional foods field
- Create website content (modify from template)
- Self-study of R, R Studio and R Shiny

Jul 2017 – Mar 2020 **Supervisor**, Hideout hostel Saigon, Vietnam

- Supervise all activities and staff (15-20 persons)
- Recruite new staff members
- Sell accommodation, tours and other services, mostly to guests from abroad
- Solve problems with customers

Mar 2016 – Mar 2017 **Quality Controlling Engineer**, Road Construction Phuc Hung Co.,Ltd, Vietnam

- Controlling quality and quantity of construction work
- Supervising machine drivers and labourers

CONFERENCES & PRESENTATIONS

Oral presentations

2025 *Barriers and facilitators to effective advanced warning and response systems for climate-sensitive infectious diseases in Vietnam*. Oxford Tropical Network Meeting, Mombasa, Kenya.

2024 *Building Citizen Science Intelligence for Pandemic Preparedness and Response: Pilot Implementation*. The Infectious Disease Modelling Conference, Bangkok, Thailand.

Workshop Demonstration

2023 Chieu Hoang Tran, **Duc Manh Nguyen**, Gabriel Cardozo Muller, Joel Mburu Kuria et al.. *The Citizen Outbreak Responder: a serious game for the management of an infectious disease outbreak*. International Simulation and Gaming Conference, La Rochelle, France.

OTHER ACTIVITIES

2025 **Teaching Assistant** — R training course, Biostatistics and Mathematical Modelling Group, OUCRU, HCMC, Vietnam

2024 **Co-organizer & Facilitator** — MIDSEA Summer School, Quy Nhon, Vietnam

PUBLICATIONS

2 peer-reviewed journal articles.

1. Arntzen VH, **Nguyen Duc M**, Fiocco M, Truong Thi Thanh L, Nguyen Hoai Thao T, Mai Thanh B, Nguyen TA, Le Thanh Hoang N, Choisy M, Phung Khanh L, Le Hong N, Geskus RB. The latency time of SARS-CoV- 2 Delta variant in infection- and vaccine-naive individuals from Vietnam. *BMC Infect Dis*. 2025;25(1):515. [DOI]
2. Tan YR, **Nguyen MD**, Mubaira CA, Kajungu D, Kumar D, Canlas FC, Sunaryoko FY, Maharjan GR, Khosa H, Hauter I, Thiga J, Anowar MM, Okwen P, Kutadza T, Chikanya W, Choisy M, Yap P. Building citizen science intelligence for outbreak preparedness and response: a mixed-method study in nine countries to assess knowledge, readiness and feasibility. *BMJ Glob Health*. 2024;9(3):e014490.
